

## IFS Capital Ltd

### Half Time Report Shows Promise

**Update:** IFS Capital Ltd ("Company") announced its financial year 2010 first quarter results on 13<sup>th</sup> August 2010. We maintain our **Invest** rating, based on an adjusted intrinsic value of S\$0.720 - representing an upside of 51.6% over its last traded price.

#### Key Developments:

- IFS commendably grew income before operating expenses by 19.9% YoY from S\$7.5m to S\$9.1m, with pre-tax profit up 7% YoY to S\$2.8m. On a half-year level, IFS expanded profit for the period by 18.5% from S\$2.9m in 1H2009 to S\$3.5m in 2H2010.
- IFS's regional operations in Indonesia, Malaysia and Thailand put in mixed half year financial performances. Collectively, IFS's regional operations recorded profit after tax of S\$1.2m for 1H2010 – a YoY decrease of 13.1%. That said, their results were in line with our prior estimates. IFS's ECICS operations also reported a lower YoY profit number of S\$1.8m (-27.4%) for 1H2010.
- Going forward, management expects the insurance business to benefit from increased trade volume as well as private sector projects for its credit insurance and bond activities. The listing of IFS Capital (Thailand) is also expected to enhance the Company's profile in Thailand and strengthen IFS's financial position to take advantage of growth in the Thai economy.

#### Outlook:

We expect Singapore's revised economic growth of 13% to 15% to bode particularly well for IFS, as financial plays are inextricably linked to the performance of the general economy and their respective country's GDP. With no major re-rating downwards in economic growth forecasts for emerging Asia, we foresee more upside than downside to current industry valuations and view IFS as a solid mid-to-long term investment.

### First Half Results Show Operational Growth

**1H2010 Results Promising:** SGX Mainboard listed IFS Capital Ltd ("Company") announced their second quarter 2010 financial results on 13<sup>th</sup> August 2010.

The Company commendably grew 2Q2010 income before operating expenses by 19.9% YoY from S\$7.5m to S\$9.1m, with pre-tax profit up 7% YoY to S\$2.8m. Notably, excluding 2Q2009's negative goodwill amount of S\$850,000, 2Q2010's pre-tax profit had actually surged a very respectable 58% YoY. IFS also recorded higher net interest income of S\$5.0m (+51.5%) as well as fee and commission income of S\$2.5m (+32.9%), compared to 2Q2009. On a half-year level, IFS expanded profit for the period by 18.5% from S\$2.9m in 1H2009 to S\$3.5m in 2H2010. Again, excluding 2Q2009's negative goodwill amount, the Company's 2010's half year operational bottom line was actually up a significant 67% YoY. IFS also posted a higher annualized net interest margin of 6.3% for 1H2010 relative to 5.1% in 1H2009.

Net interest income continued showing improvement over the half year passed on the back of recoveries of interest previously suspended; recognition of current and prior years' interest repayments of a significant property loan upon completion of its development project and the consolidation effects of Thailand's income. Fee and commission income also performed well due to higher insurance profit commission earned from reinsurance Quota Share Treaty as well as factoring fees from the Company's Thai operations. There were also reduced allowances for loan losses and impairment of investments over 1H2010 due to there being zero investment impairments recorded. This was partly offset by higher specific allowances for loan losses of S\$2.6m.

We noted that the robust 1H2010 financial performance by IFS was nonetheless affected by lower net earned premium revenue due to a lower net write back of change in provision for unexpired risks. Aside, investment income was also lower as a result of: 1) fair value losses on a derivative hedging for an available for sale quoted investment; 2) 28% increase in half year operating expenses.

### Regional And Other Ops Performance Expected

**Regional And Other Operations:** IFS's regional operations in Indonesia, Malaysia and Thailand put in mixed half year financial performances. That said, their results were in line with our prior estimates. The Company's Indonesian business posted a lower 1H2010 net profit YoY on the back of higher allowances on loans and factoring receivables. IFS's Malaysia business recorded a lower net loss for the first half of 2010 due primarily to higher factoring income that was partly offset by higher impairment of loans and factoring receivables. For the Company's Thai operations, which was listed on the Stock Exchange of Thailand on 10<sup>th</sup> August 2010, while 1H2010 operating revenue was higher as a result of increased factoring volume and favorable interest margins; first half 2010 results were marginally lower YoY.

This can be attributed to higher operating expenses and allowances for loan losses compared to a reversal of allowances for loan losses in the first half of 2009. Collectively, IFS's regional operations recorded profit after tax of S\$1.2m for 1H2010 – a YoY decrease of 13.1%. IFS's ECICS operations also reported a lower YoY profit number of S\$1.8m (-27.4%) for 1H2010 on the back of a decline in net earned premium revenue from the lower write back of a change in provision for unexpired risk to income as well as higher operating expenses. This was offset by increased commission and investment income as well as lower net claims incurred.

### IFS Value Proposition

**The Bottom Line:** We are encouraged by management's frank and candid responses to questions during our attendance at the Company's results brief. Going forward, we understand that IFS will continue to expand its overall operations. Management expects the insurance business to benefit from increased trade volume as well as private sector projects for its credit insurance and bond activities. The listing of IFS Capital (Thailand) is also expected to enhance the Company's profile in Thailand and strengthen IFS's financial position to take advantage of growth in the Thai economy.

Despite a forecasted global economic slowdown, IFS expects the region’s resilience to hold strong with economic activity moderating as opposed to plunging.

Based on revised estimates released by the Ministry of Trade and Industry, Singapore’s economy is expected to expand by a substantial 13% to 15% in 2010. This statistic bodes particularly well for IFS as financial plays are inextricably linked to the performance of the general economy and their respective country’s GDP. In addition, with no major re-rating downwards in economic growth forecasts for emerging Asia, we foresee more upside than downside to current industry valuations moving ahead. IFS’s NAV as at end-1H2010 stands at S\$0.866. IFS’S non-bank financial comparables trade at an average Price-To-Book value of 0.83x. This values IFS at \$0.719. Therefore, we maintain our call on the Company and adjust our valuation to S\$0.720. Recommendation: **Invest**
